

AL

Many people merely see AL as the abbreviation for the 13th element in the periodic table, but for us it means much more!
Aluminium is the core element of our business and the focus of our expertise.

Our business creates sustainable solutions around innovative ideas. Our highly efficient, customer-orientated team measures its success on performance. Just like ants; just like AL!

AL for ALUMERO.

MY NAME IS AL.
AL AS IN ALUMINIUM.

The vision of establishing an effective, flexible and high-performance business within the market – centred on the use of aluminium – quickly came true.

However, back then we wouldn't have dared to dream of becoming one of the leading businesses for the segments we serve – but we've done it...

Thanks to AL !

OUT OF THE WAY!
HERE COMES AL!

EXTRUSIONS

Peace is what our highly qualified specialists require when planning precision micro-profiles before the sheer power of the high performance presses transforms these projects into aluminium reality.

AL says:

**Successful projects require power –
our customers require peace.**

THERE IS STRENGTH IN SERENITY.

WE SHARPEN YOUR PROFILE.

ALUMERO develops the best and most affordable extrusions for every specific task and requirement.

As well as guaranteeing the very best quality there is also a clear focus on professional project management and punctual delivery in all areas of the business. ALUMERO employees see themselves above all as project managers. Although they are required to deal with specifics in great detail, they never lose sight of the bigger picture.

PERFECTION IN FUNCTION AND FORM.

The exact mechanical processing of our precision profiles necessitates an immense degree of knowledge and skill.

Modern computer-driven processing centres guarantee hitch-free work flow and supreme product quality.

Be where the sun shines! There is no segment that allows us to prove the sustainability of our innovative concepts better than this one.

We invest all our energy into the ultimate developmental goal of harnessing the power of the sun. All our efforts are focussed on the development of new technologies in the field of renewable energy. Looks like AL has deserved his place in the sun!

AL always says:

The sun is nature's best filling station !

HERE COMES THE SUN.

INNOVATION FOR THE FUTURE.

ALUMERO specialises in system framework technology for photovoltaic and solar power plants, as well as for outdoor, facade and roof-mounted solutions. Special laminate solutions, modular clamp-on technologies and special custom-built constructions all belong to our core body of expertise.

THE FUTURE OF MOBILITY.

THE CARPORT THAT FILLS UP WITH SUNLIGHT.

Park in the shade while filling up with solar energy free of charge! ALUMERO SOLARPORT is the forward-thinking, sustainable solution.

A remarkably simple state-of-the-art concept incorporates high-tech components. Extremely efficient solar panels provide cost-efficient solar energy and shelter the car from the wind and the rain. The innovative E-cars of today park in the shelter and recharge with the power generated by the roof.

AL says:

**Motion in tune with nature –
simply amazing!**

Aluminium is a light metal.
So light that it's also ideal for furniture and interiors.
After all, if you're going to refurnish – why not relaxed, light and easy?

AL says:
Life is heavy enough!

LIVING

TAKE LIFE LIGHTLY.

QUALITY GENERATES TRUST.

ALUMERO is more than just a manufacturer of aluminium extrusion profiles that offers subsequent mechanical processing. It's also an efficient and effective provider of systems and complete solutions with a comprehensive, integrated service and production concept for the furniture industry.

Above all, on top of the technical benefits, there are strong aesthetic arguments in favour of the use of aluminium within the furniture industry. Aluminium opens up almost unlimited possibilities for designers and product developers. Our technicians and engineers are happy to offer assistance, starting at the design and development phase, to tailor the aluminium extrusion profiles precisely to your needs.

The logo features a solid blue circle with the word "BAUTECH" in white, uppercase, sans-serif font. This central circle is surrounded by several concentric dotted circles of varying diameters, creating a ripple effect.

BAUTECH

We ants know all about how to build. Great constructions, excellent teamwork, weatherproof and built-to-last.

Every form of life has its own way of building and preferences for particular building materials. Humans are increasingly choosing aluminium.

AL says:
They almost build as well as we do!

QUALITY YOU CAN
BUILD ON.

YOUR SPECIALIST FOR ALL ALUMINIUM BUILDING SHELLS.

Modern aluminium facades are 'in'. The construction and colouration of a facade is a building's calling card and says a lot about the inhabitants. The eye of the beholder encounters the image and philosophy of the owner. Alumero was very quick to recognise this trend and over the years has become a specialist in facade technology.

Aluminium is extremely lightweight and is an excellent insulator. Window systems with thermal barrier profiles make a significant contribution to reducing expenditure on heating and provide pleasant air quality.

Quality you can build on.

NOISE PROTECTION.

Constant noise can damage your health and wellbeing. Urban sprawl is rapidly encroaching on outdoor recreational spaces. To avoid a permanent reduction in the quality of life enjoyed by residents it has become necessary to counteract the resultant noise with ultra-modern sound-proofing systems.

We produce a state-of-the-art generation of noise barriers according to the highest technical standards. Aluminium panels in a variety of designs, transparent glass elements, prefix shells and sophisticated hybrid solutions enable us to offer an immense range of options that can be integrated seamlessly into any given environment.

ISO 9001

Quality is not a matter of luck; it's the sum of all the details that contribute to the value, functionality, technology and shape of a solution.

ALUMERO quality management is the company's guarantee for professionalism and reliability on an international stage – today and for tomorrow. Our internal 'Systematic Solutions' system forms the basis of our successful project management approach.

Guaranteeing sustained and sustainable quality is the result of a carefully developed corporate philosophy officially in accordance with ISO 9001:2008 + TÜV standards.

I STAND FOR
QUALITY.

SERVICE & KNOW-HOW

Our comprehensive customer service portfolio provides everything from expert advice on innovative solutions to cost efficient, automated production – from components and modules, to custom-built packaging and logistics concepts.

OUR QUALITY MANAGEMENT.

- ✓ Modern quality management according to EN-ISO 9001:2008
- ✓ Superior delivery standards guarantee our success
- ✓ Certified RAL quality inspectors
- ✓ Customer-orientated quality agreements
- ✓ Quality management as an active and dynamic process
- ✓ TQM from planning to purchasing – right through to distribution
